

# Abortion Rate Project: 2020

2020 Total Abortions: 19,438, or 13.07% of All Pregnancies

*An increase of nearly 3% and 0.7%, respectively*

Greater Columbus  
**Right to Life**  
 Growing a Community of Life

The Abortion Rate Project is an educational program of Greater Columbus Right to Life. Each county is represented by two figures. The whole number is the total number of abortions reported as being performed on women who reside in that county and the state. The second number is the abortion rate as calculated from the number of live births and induced abortions, presented as a percentage and rounded to two decimals. Numbers published in red indicate an increase from the year prior. Note that due to how Ohio records miscarriage and stillbirths, those infants are not included in the calculation. All statistics are derived from numbers published by the Ohio Department of Health.
