

2021 Abortion Rate Project

In-State Ohio Resident Abortions: **20,716**

Statewide: 14% of Ohio Pregnancies ended in abortion

The Abortion Rate Project is a program of Greater Columbus Right to Life. We calculate statistics using live births and induced abortions as reported by the Ohio Department of Health. These figures do not include miscarriage or stillbirth. The upper number represents a total number of abortions performed on women living in that county and the lower number represents a calculated rate of abortion. Red indicates an increase from the previous year.
